Large Turnout At School Meeting

The annual meeting of the ratepayers of Champion Consolidated school district was held in the public school building on Saturday last. James Brown in the chair. After the reading and approval of several reports the meeting adjourned. Mr. McCullough was elected chairman of the meeting for the election of trustee, with H. Cooper acting as secretary. Two nominations resulted, that of James Brown by M. G. Claver and H. E. Gill, and that of J. D. Henderson by H. E. Smith and G. L. Depute, the former being elected.

A vote of thanks by H. E. Gill and F. J. Clapp was extended to Mr. Brown for his services in 1931-32.

There was considerable discussion, the trend of which was the advisability of teaching grade 12 in Champion. No definite conclusion was reached. The meeting was largely attended.

Badminton Players Trim High River

Members of the local Badminton club journeyed to High River on Thursday evening and after a series of very interesting games, took the long end of the score 147 104. Players from Champion were: Mr. and Mrs. Campbell, Mr. and Mrs. Ditto, Mr. and Mrs. McIntyre, Mrs. Melita Fath, A. Anderson, C. Sarr and F. Watts.

After the games refreshments were served.

Large Crowd Attends Party

Approximately two hundred guests gathered at the home of Mrs. U. D. Smith recently, when Morgan was host at a very enjoyable party. Dancing and cards furnished an extremely pleasant evening. Delicious refreshments were served.

Ladies' Aid Elects Officers

The annual meeting of the Ladies Aid was held in the church on Thursday, December 29. The new officers elected for the year 1933 are as follows: President—Mrs. Manhard, secretary—Mrs. Dawson, treasurer—Mrs. McIntyre.

Which is The Best?

There is more or less of a dispute as to whether Mrs. McIntyre or J. D. Henderson is the best popcorn eater. There should be some method by which this could be permanently settled.

Opening Hospital

Mrs. Mary Woodhull wishes to announce that she is now in a position to care for maternity patients and other patients requiring medical care, at her home. Rates \$2 per day including nurse.

Local & General

Mr. and Mrs. Guy Voisey are visiting in Calgary.

Miss Mary Cook was a Vulcan visitor over the week end.

Miss Cook and Miss Clarkson spent last week end in Vulcan.

Miss Ruth Olsen of Stavely is visiting at the home of Mr. and Mrs. E. Weiss.

E. Fisher has opened an office in the building formerly occupied by E. Sisson.

P. O. Sommers, who has been seriously ill for the past two weeks, is recovering slowly.

Miss Forbes McGillivray of Calgary has been a guest at the home of Mr. and Mrs. Voisey.

Mr. and Mrs. F. Watts were Lethbridge visitors over the week end.

Mr. and Mrs. Boers and family left for Germany Monday night.

The Ladies' Aid will meet at the home of Mrs. Manhard on Thursday, January 26.

Mrs. Barker, who has been visiting in Newport, Washington, returned to Champion this week.

Mr. and Mrs. Louis Warren were visitors at the home of Mr. and Mrs. John Cook in Calgary during the week.

Miss Mary Zang and Clarence Robinson were week end visitors at the home of Mr. and Mrs. Arthur Nelson.

Mr. P. Holm was operated on for appendicitis at the Vulcan hospital on Saturday evening and is reported doing well.

M. F. Hamilton took in the hockey game between Saskatoon and Calgary held in Calgary on Friday night.

Misses Kathleen and Mary O'Connell, Mr. John O'Connell and L. Platt of Brant were recent visitors at the home of Mr. and Mrs. L. Ohlheiser.

N. A. Gaymon, known as Bujo Daddy, 80 years old, will give a free concert of Old Time Music in Campbell's Hall, Saturday Nite, January 28th—Collection only.

A number of young people gathered at the home of Miss Jessie Williams on Friday night in honor of her birthday. The evening was spent in cards and dancing.

Mrs. W. McRae was a luncheon hostess on Tuesday in honor of Mrs. Ginson of Calgary. Mrs. Ginson is the Supreme Honored Royal Lady of the O. O. R. P.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, Jan. 27th at the Drug Store.

Simple Installs Officers

On Tuesday afternoon January 19 the officers of the Royal Purple were installed, Mrs. Gibson, Supreme Honored Lady officiating. Mrs. Gibson was ably assisted by Lady Alma Hagg.

After the installation a most delicious turkey dinner was served in the banquet room of community hall.

The retiring Royal Lady, Mrs. Mac presented Lady Gibson with a beautiful pierced silver boudon dish in appreciation of her services rendered during the afternoon. Mrs. Gibson replied in a very gracious manner.

Short speeches were given.

Invitation Bonspiel Starts Wednesday

Twelve rinks will compete for the "Silver Spray" and "Barns" Cups beginning Wednesday, January 25th. These games will be played in the evenings and Wednesday afternoons.

Card of Thanks

Norman Carlson wishes to thank the ladies Amity Club for flowers sent him while in the Vulcan hospital.

Card of Thanks

The Ladies' Aid extend their hearty thanks to all the ladies who so kindly assisted in serving during the bonspiel and to those who so willingly donated cooking.

THURSDAY, Jan. 10, 1935

Let's All Get Square

"Hope springs eternal in the human breast." Here we are nicely launched on a brand new year with practically all of us agreeing with ourselves to make it a year of more determined effort to get ourselves squared up with the world. The big question, however, is how to do it.

The writer was in a local store one day last week and overheard a conversation that did his heart good. It was between the merchant and a gentleman who evidently owed the store a bill amounting to about fifty dollars. And fifty dollars in these times might well be looked upon as a lot of cash.

Walking up to the counter the customer said to the merchant "I suppose all contributions will be gratefully received?" The merchant's reply was "Most certainly—no matter how small they might be."

After the payment had been made and credited, the merchant frankly told the customer how very much he appreciated his coming in and making a payment on account whenever he had the money to spare. He went on to explain that conditions would be materially improved if all those people who owed him money would endeavor to pay off their accounts a little at a time instead of continually putting it off in the hope that sooner or later they would be favored by the gods of fortune and accumulate enough to wipe out the entire account with one payment.

It is a well known fact that the person who makes conscientious efforts to clear himself of debt is able to walk up the street with his head a little higher than the individual who is too proud to admit that he cannot pay it all at once.

During 1933 let's all be honest with ourselves. Let's make a successful attempt to wear down our indebtedness to our fellow townsmen. It can be done by placing a five-spot here and a five-spot there whenever we get our hands one one. If we wait until we can make fifty-dollar on one hundred-payments it is safe to say that the dawn of 1934 will find us all in much poorer circumstances than we are at the present time. And above all let's do all of our shopping with our home town merchants.

Alberta Health Conditions

General health conditions in Alberta during the past year have been on record, according to the reports of the provincial health department, a new high mark for freedom from communicable diseases having been established. The year's death rate, 7.2 per 1,000, was somewhat lower than the previous year, while infant mortality showed a marked improvement being only 58 deaths under one year of age, in each 1,000 births compared with the rate of 67 deaths the year before.

Lower the Cost of Producing Beef

Get More Out of Feed Crop

There is a cost line running through every animal on your farm

Fully 50,000 farmer owners of Letz Mixed Feed Makers have positively proved that you can lower the cost of producing beef, pork, mutton and dairy products with the Letz System of Home Crop Feeding. Their results show that Letz Mixed Feed Makers will:

1. Save 25% to 50% of present feed crop by utilizing waste.
2. Release up to 25% of your present feed crop acreage for cash crops.
3. Increase milk and meat production up to 30% through better feed preparation.
4. Save up to 25% of labor in handling feed crops.
5. Improve health and condition of all farm animals.

Come in the next time you are in town and let us show you how the Letz Mill will solve your feeding problem for you.

GRANLIN MOTORS

How to Fashion Belts from Package Wrappers

SMART, colorful, shimmering belts, made from the transparent coverings of cigarette, cigar, candy and other packages, are the craze both in New York and Hollywood, the movie folk sometimes making their belts on the lot between shots. "Cellophane" has thus taken its place as a material for the practice of another home art easily acquired in these practical times. It is used, not only for belt making in various woven and braided versions so attractive with sports clothes, but for catching the hand bags and hats as well.

Unusual color combinations and patterns are achieved through various methods of weaving the strips. One of

inch wide. Fold the "Cellophane" as for the diagonal weave, but fold outside edges to the center once, then fold again lengthwise, thus making the finished strip 6 inches long by 5 1/2 inches wide. Make the links exactly as for the diagonal weave belt. Hook two links together by inserting the ends of one through the sides of another. Hold the two together with a pin, as shown. Insert a third link (arrows) through the closed end of the first two. Insert a fourth link, looping it outside the first and through the second. Be sure that this link is passed on both sides of the first link, and not both sides on top of it. Insert a fifth link, as shown, and continue until desired length is obtained.

"Cellophane" in plain transparent quality or in colors, for the making of these smart belts, may be secured from the protective wrappers now supplied on many household articles or in convenient rolls from any department, stationery or plastic materials are to be had in many chain stores.

"CELLOPHANE" is the registered trade mark designating cellophane sheets and films, manufactured in Canada under special arrangements with the DuPont Cellophane Co., Inc.

\$1.50 Allowance for Your Old Lamp or Lantern ON A NEW Coleman

Right now your old lamp or lantern... regardless of kind or condition... is good for \$1.50 at our store on a brand new Coleman. The finest pressure-gas Lamps and Lanterns ever produced.

They light instantly and produce up to 300 candle power of brilliant natural light. New Rocket-Type Burner assures continuous, trouble-free lighting service at less expense.

Now—for a limited time you take your choice of any of the newest models... use your old lamp or lantern as part payment on your new Coleman.

World Has Still Much To Learn About The Production And Distribution Of Our Food Supply

Some day when dreams of internationalism come true and the world is just one big neighborhood, folks will marvel at the confusion reigning today over the production and distribution of foodstuffs. It is probable if political interference were abolished and adequate international currency facilities were invented, that production of necessities by cultivation of the soil would settle to a beneficent normal pretty shortly. Every last human being would have enough and to spare and starvation and disease from malnutrition speedily would become unknown.

But in the crazy system now prevailing in the world, we have all sorts of policies in force either to spur on reluctant production or to curb production where the boundaries of earth are easily and naturally obtained. The American Congress will spend a great part of its session trying to secure adequate rewards for American farmers if they will not produce too much. Over the greater part of Europe, governments are using the people's money to stimulate farm production so that they need not buy from nationals other than their own.

Great Britain, through a complicated tax system, virtually is paying a bounty for the growing of wheat in the British Isles. Germany and Italy and France are providing, at public expense, rewards for increased production of farm products. The Netherlands government is experimenting with price fixing to encourage wheat growing. On the other hand, Netherlands regulations would check the raising of too many hogs by limiting a limited number of tags to hog raisers and requiring every such animal going to market to be tagged, as is the practice in this country with reference to the shipment of deer. Brazil, to maintain the price of coffee, resorts to the ridiculous system of pegging the price by the government buying and then destroying all surpluses.

The human race can hardly boast of its wisdom while it resorts to such uneconomic practices in managing its food supply, while millions of its members are not well fed.—Detroit News.

Legends Are Mere Myths

Trees Credited With Unnatural Powers Are Quite Harmless

The man-eating tree of Madagascar which an explorer has announced he is going to find, is one of the world's hardest myths. Quite obviously a tremendous exaggeration of such familiar insect-eating plants as the sundew and the Venus fly trap, has been used for generations by Madagascars to fool credulous people.

The legend of the deadly yupa tree of Java is another similar yarn. The ruthless-looking Malay tells the visitor of a tree so poisonous that its very "breath" kills all plants and animals for miles around. Actually the yupa tree ("yupa" is Javanese for "poison") exists, but it is easy to approach, and its poison has to be jabbed into you on an arrow point to do you any harm.

Syphon Was Powerful
McPherson was staying at a hotel for the first time, and requested that a glass of whisky might be left in his bedroom for his use when he returned home from the theatre. Next morning the waiter tapped in on McPherson's door and asked if he found his drink all right the previous evening.
"Oh, yes! It was there 'rich," answered the Scot, "but, man, that was a terrible syphon, ye lord. When I used it the rush o' water washed at the whisky out o' the glass and nearly ruined everything in the room."

"Syphon, sir, I didn't leave no syphon," protested the waiter. "You must have used the fire extinguisher."

What Shortage In Roumania
School children, theological students, police and soldiers in Roumania will have no white bread next harvest. It has been discovered that the wheat crop is shorter than expected. The minister of public instruction has advised boarding schools to serve dry bread and "mangels," a stiff porridge.

Gregory T., a follower of Benedict, made Pope in 960, was the first monk to take the papal office.

W. N. U. 1977

Strange Strain Of Cattle

Native To Philippines Cannot Live Without Salt Water

From the Philippines, United States Protectorate in the Pacific Ocean comes word of a strange strain of cattle which cannot live without salt water.

Dr. Emilio Sanon, supervising veterinarian of the Philippine Bureau of Animal Husbandry for the district of Zamboanga, has submitted the first formal report on the extraordinary salt-water cattle of the Sulu Islands. The animals require brackish or even sea water to survive and have long been a puzzle to scientists. A series of experiments was conducted in which it was established that these cattle, if removed from the salty marshes of Sibutu, near Jolo, and put upon fresh water and normal pasturage, die within a short space of time.

Fresh water is not obtainable on the small islands to which they are indigenous. It is the belief of Dr. Sanon that they offer an interesting study in natural accommodation to prevailing conditions. Conversely, experiments were conducted with carabao, horses and goats taken to these islands. They are reported to have accommodated themselves quickly to salt water and the prevailing pasturage and eventually to have thrived. So far, however, all attempts to transplant the truly native cattle to land and presumably more favorable conditions have resulted in failure.

The meat of the salt-water cattle is darker in color than that of fresh water varieties and is not easily susceptible to refrigeration. The commercial market is restricted to the Sulu group, but the Bureau of Animal Husbandry hopes eventually to establish some type of refrigerating station near the islands so that it can be put on the Manila market.

Fighting Radio Tax

Ontario Lawyer Refuses To Pay Federal License Fee

A lawyer residing in the Border Cities who is also a taxpayer solicitor or declares that although he has been summoned to police court for non-payment of the annual Federal license fee for the operation of a radio in his home, he has no intention whatever of paying it. "I did not pay for a radio license," he admits, "I'm not going to pay. I submit they can't collect it either. I do not believe the tax is constitutional."

If this man takes his case to a higher court and fights it successfully, an interesting situation may develop, since returns from the radio license fee, which some call a tax, are intended to prove the mainstay of the national radio system that is about to be established. It is evidently the belief of the Border Cities lawyer that the collection of this license fee or tax is not within the province of the Federal authority and ought to be reserved to the provinces. Should his point of view be sustained, some changes will be in order.—Brookville Recorder and Times.

Suitors—Dr. I—er—am seeking your daughter's hand—er—have you any objection, sir?
Father—None at all. Take the one that's always in my pocket."

Market For Alfalfa Hay

English Dairymen May Import It As Feed For Calves

State of alfalfa meal and alfalfa hay have never been extensive in the West of England, but increasing interest is being shown in both these products recently. In view of the fact that in the West of England and South Wales clover mixture is in demand as a feeding stuff, alfalfa hay not being favored, it is interesting to learn that the Gloucestershire Milk Recording Society have been conducting experiments with alfalfa hay as a feed for calves, and they are of the opinion that it may increase the butter fat content and improve the color of the milk. There is a possibility that if this becomes popular they may import alfalfa hay. Canadian alfalfa meal is quite out of the market owing to the adverse exchange situation. South African meal, however, is not affected and it is said to be of a deeper green color than that from Canada and is, therefore, well liked. Last year there were certain imports from Canada which have been apparently quite satisfactory.

Present prices which are being offered for the South African meal with a fibre content of 27 per cent range from \$28.12 to \$28.60, figures which change at \$3.50 to the pound sterling per ton of 2,240 pounds, c.i.f., London or Liverpool. Supplies from Canada are very few. South African vessels call at Avonmouth, whereas a continuous service is provided between this port and Canadian ports. Recently offers of Canadian alfalfa meal have been made at \$25.17 by consumers, which would mean about \$24.70, c.i.f., Avonmouth, to the shipper. In addition to this being a deep green color, important factor that the meal is finely ground but not dust, and that leaf and not stalk be used for grinding purposes.

Oil Penetrates Metal

Astonishing Discovery Was Recently Made By Two Experts

Discovery that oil penetrates metal instead of merely forming a clinging film on its surface, as formerly supposed, may improve lubrication methods. According to two experts, who recently reported this surprising fact, oil may be wiped from the surface of a bearing, and a new film will soon appear.

Reported It Anyway

Police Inspector to Little Binks: "He has reported that his wife is missing; 'So you want us to find her?'"

Little Binks: "Er...no—thank you."

Inspector: "Well, why do you come?"

Little Binks: "Because, if she came back and found I hadn't done anything about it, she'd half kill me!"

"My son came out today. He got four months taken off his sentence for good conduct."

"Then, you are... I always said you would be proud of that boy."

Cotton and artificial silk material is being made by a process that insures it against wrinkling.

New Photographic Telescope In California Will Bring Planets Into Close Range Of Vision

Minerals Are Necessary

If Lacking In Ration Growth Of Pigs Is Slower

If properly fed a young pig will increase its weight one hundred times in six months, or about two hundred pounds at birth to about two hundred pounds at six months old. To produce this very rapid growth all the necessary elements, including minerals, must be provided. If minerals are lacking in the ration, the pigs become unthrifty in condition, and growth is much slower. Spring pigs secure the necessary minerals largely from pastures and from eating the freshly rooted soil. Minerals from these sources are not available for fall litters, which are fed mainly in dry lots and pens, and an adequate mineral ration should be provided.

A simple mineral mixture, which has been used successfully for a number of years at the Dominion Experimental Station, Lacombe, Alberta, consists of 76 pounds of chalk, 20 pounds of salt, 3 pounds of air-slaked lime or ground limestone, and one pound of sulphur. The mixture is fed in boxes, or in separate compartments of the self-feeder to which the pigs have free access.

Cattle Exported To Britain

First Shipment Made From Canada Since Last Fall

First shipments to the United Kingdom since last fall when exchange rates placed such a handicap on the live cattle trade that it disappeared, export cattle numbering 200 head and including a few heifers, started for Liverpool January 7. Referring to the proposed barter arrangement by which Canadian cattle would be exchanged for Russian oil and coal, Dr. Bruce Burns, one of the shippers, said:

"The government doesn't need to take the risk of losing millions on a Russian deal. If it could provide as much as \$100,000 to establish a lower freight rate it would mean millions of dollars to the Canadian farmers on the cattle they could sell on the domestic market in the United Kingdom."

C.N.R. Rails For Japan

More than 100 miles of second hand rails were shipped to Japan from Saint John, N.B., in the steamer "Ferdinand". The rails, weighing 75,000 gross tons, are under standard gauge and represent replacements on the Canadian National lines in New Brunswick, Nova Scotia and Prince Edward Island during a period of over three years.

Jim—"I don't mind looking after your horses but I don't want to be called the 'hofter'."

Tom—"Oh, that's all right—I'll call you our stabilizer."

The Central Railway of Peru was constructed between 1871 and 1881, and has been made by a process that insures it against wrinkling.

JAPANESE CONSOLIDATE MILITARY POSITIONS—CHINESE RETURN FIRE

Here is a section of the Great Wall of China at its strongest point outside the city of Shanhaiwan. It is here that Japanese tanks and artillery made a breach and stormed the city, inflicting severe casualties on the Chinese defenders. The map shows the general location of the latest "war area." Shanhaiwan, as can be seen, is the gateway to Jehol Province. Inset, lower left, is General Yonishichi Suzuki, who commands the Japanese forces at Shanhaiwan. The right is Marshal Chang Hsiao Ling, Chinese commander, whom the Japanese blame for the overt act that started hostilities.

The moon and some of the planets will be brought theoretically to within 25 miles of the earth by the 200-inch photographic telescope at the California Institute of Technology at Pasadena, California, according to Dr. Frederick C. Leonard, head of the department of astronomy.

It may be possible to distinguish objects 30 feet apart on the moon's surface by employing a magnification of 10,000 diameters in the giant telescope. Ordinarily much smaller magnification is used because of atmospheric conditions. However, with proper atmospheric surroundings the greater refraction range would enable astronomers to view the moon and other heavenly bodies at extremely close range.

This telescope is designed to collect and photograph in a unique manner a vast field of some 500,000 stars. However, the machine can be adapted for direct observation.

Mount Wilson Observatory, where the 200-inch telescope is located, is the world's largest, is just a few miles from the California Institute of Technology. The institute and the observatory have been active in astronomy research and findings.

Dr. Leonard pointed out that estimates have revealed that there are in the neighborhood of 500,000 stars brighter than the nineteenth magnitude, which is the visual field of the 100-inch telescope. Although the estimate has been attempted as to the possible scope of the 200-inch instrument, Dr. Leonard said that probably a billion, and a half stars would come within its range. Hence the giant telescope will reveal about as many stars as there are people on the earth. The photographic lens makes possible the recording of a far greater number of the heavenly bodies than can be detected with the naked eye. In all, only about 6,000 stars are visible, Dr. Leonard said.

A telescope is designed to collect light and not to magnify, as is commonly supposed by the layman, the scientist explained. It can be compared, for example, to a camera. The photographic lens makes possible the recording of a far greater number of the heavenly bodies than can be detected with the naked eye. In all, only about 6,000 stars are visible, Dr. Leonard said.

In describing telescopes, Dr. Leonard explained that there are just two principal types—refracting and reflecting. The refracting telescope is similar to opera glasses, and is composed of a large double lens or object glass. This glass, located at the upper end of the instrument tube, gathers light from the stars and concentrates the rays to the eye of the observer.

The reflecting telescope is composed chiefly of a large concave mirror, silvered on the front surface rather than the back, as with ordinary mirrors. This mirror is mounted at the lower end of the tube in the reflecting telescope.

Seven Is Lucky Number

Replaces Thirteen With Gamblers At Casino Along Rivers

There is a craze for number seven among gamblers at the casinos along the rivers. They maintain that seven has replaced thirteen as a significant number, pointing out that all France's great tragedies last year occurred on the seventh of the month. Thus:

On January 7, M. Maginot, Minister of War, died.
On March 7, M. Briand died.
On May 7, President Doumer was assassinated.
On July 7, the submarine "Prometheus" was lost.
The tragedies happening in each alternate month.

"Not a bad novel, but I only publish works of men with well-known names."
"That is all right—my name is Smith."

"Henry," said his nagging wife as she prepared to retire. "Is everything shut up for the night?"
"That depends on you, my daughter. Everything else is."

CHAPTER IV.—Continued.

Alan's estimate that his quarry could not be more than half a mile in the lead, was true enough; but a stern chase is a long chase, and if those bandits were aching from exhaustion, they had the fear of death in their hearts to add to them.

A whole hour, an hour of terrible labor, went by, and still no sight or sound of the bandits. With the responsibility of this patrol on him, with human lives, the lives of comrades, at stake, a fear gripped Alan that those bandits had taken the south branch of the Alaska. If they had, Frank Pedneault and those two new recruits might run into an ambush; or Ped might attack them, reckless fellow that he was, practically lone-handed, and get killed.

The chase was entering the Thal-Aziah itself, that water wilderness of lakes and labyrinthine channels and muskeg thousands of square miles in extent. Not far ahead the branch split into a dense channel leading in every direction. Pursuit was impossible there. A few miles more, and those canoees would be swallowed up in the watery oblivion of the Thal-Aziah.

But then, as he skirted around a headland, his prophesy yesterday, of his conviction, founded on long man-hunting experience, that those bandits would follow this left branch, were suddenly proved true to the letter. On ahead, a scant thousand yards, he caught one fleeting glimpse of two heavily laden canoees that carried six men.

Dipping faster, deeper, he and Larry paddled at a furious pace to come up within rifle range. The river was so winding that they could see only a few hundred yards in front. There was danger, a terrible danger, of running straight into a blind ambush where all three of them would be killed outright and their canoees sunk before they even could start to shoot back. Every stroke, every curve, every clump of flags they skimmed close past, was a deadly peril. They knew it, but they dared not slow up. They were taking their chances.

As they skirted out upon a shallow little lake fringed about with tall flags, Larry suddenly heaved back at his paddie.

"Lift out! Look! Alan, look over there!"

Alan looked where he pointed, at the north shore, at the wall of dense reeds. A path had been broken through the flags there; the reeds were parted, some of them trampled, their tops bent to either side.

It told the story to him. Hard-pressed, these men had whipped ashore to shake off pursuit, to escape to shoulder, and were trying

W. N. C. 1937

to cut north and hit another channel. Obvious to ambush danger, they skinned over to the telltale break in the flags and drove out upon the mud. Alan and Bill sang the canoe upon their shoulders; and with Larry in the lead, following the signs, they started at a lunge back through the flags.

Within a few hundred yards they came to a little creek, a sluggish muskeg highway that led north. The bandits had taken it. Too shallow for a canoe, they had had to wade. So recently had they passed, the water was still rolled from their boots.

The little creek took Alan's party a thousand yards north to a lake, a deep blue lake covering several acres; and there, within the Thal-Aziah itself, late in the afternoon, the long relentless chase came to its end.

Larry, a dozen steps in the lead, glimpsed the silvery sheen of water ahead; and stopping dead-short, motioned Bill and Larry to be cautious. They waited forward toward the lake edge where the flags were thin and they had clear view.

After several minutes of waiting, Larry pointed across the lake and stated quietly:

"You see that big patch of brownish flags over there, about thirty or forty yards back from the water? See that little run leading back into them? That's where our men are hiding. They're laying low along that little run. I just noticed a rat start up that run. He came out in a hurry. There, there's a silent spot over there. He's a silent spot over there. I don't hear any bird or animal calls. And then some other signs. . . . He was silent for half a minute. Finally he whispered: 'I'll show you a sign. You see this canvas-backs-coming this way? They're flying low, making for this lake. Canvas-backs like blue water. Watch them!'"

Skimming just over the flags, the pair of graceful ducks came; but just as they stopped beating and started to alight upon the lake, they suddenly breathed high up in the air, exactly over the spot Larry had indicated. Veering away, they winged swiftly out to the west.

Lying there in the reeds and bog, Alan studied the bandit cover and tried to plan. If all five of his men had been along with him, the outcome would have been swift and certain. He could have come at the bandits from either side, cut off any chance of escape, boxed them between two fires and deliberately shot them down. But he had split his party at the Alaska Falls, as Haskell ordered. Now, at this crucial hour here in the Thal-Aziah, Pedneault and those other two men, uselessly following that south branch, were a hundred and forty miles away.

He planned, rejected and planned again, and finally came to a decision. "We've got to carry the fight to them, and we've got to keep them from getting away by that creek yonder. There's only one way we can do both those things. Bill and I are going to circle the creek on foot, and come at them from the other side. We'll get there somehow, even if we have to swim part way. With our hands, we'll get up to a position where we can put two or three of them out of business at the very beginning, before they wake up and start to shoot back. We'll keep them in the water, with these little reeds to help hide us, we can sneak from one house to the next. The last one isn't a dozen yards from those men. If we make it we'll have point-blank range and the best kind of cover to shoot from."

"Taking off their hats and jackets, they wriggled carefully out of the flags, eased into the water and squirmed toward the first muskeg house, which stood up four feet above the surface, entirely hid their approach. Behind it they stopped a moment, chose their next one, and sank back into the water.

As they creased down behind the third little dome of mud and reeds, a towering red-bearded man parted the flags they were staring at, bent and scooped up a handful of water, took a swallow, threw the rest down with an oath at its vile taste; and then, snaking the water out of his hat, he disappeared again.

Alan's last secret doubt about these bandits being utter strangers in the country was dispelled now. He had had a clear view of this red-bearded leader; he could say positively, as Ashmun and all the passengers had sworn, that he had never laid eyes on the man before.

To Bill he whispered: "When we reach that lake house, I'll splash or do something to draw their attention. They'll come out to the flag edge

ACTS TWO WAYS AT ONCE

Alan's hopes had risen again; it seemed that he indeed "had taken his luck along." The bandits did not know they were being stalked. In half an hour more, if luck held, he and Bill would be in position to open on them all unawares.

Dropping at last to hands and knees, the two of them crawled along through mud and water, keeping only their guns dry. They came up within a hundred yards of their quarry.

As he parted the reeds in front of his face Alan saw the tops of a clump away suspiciously. A moment later he glimpsed the dim outline of a man standing up, stretching himself, sitting down again.

In actual sight now, those men who had killed Jimmy Montgomery! Here was a pilot shot away! But to take them. . . . Alan cursed savagely at the thought of Pedneault and those two men a hundred and forty miles distant. As he remembered what Haskell said about the Law being behind his patrol, his lips curled in scorn at the cant expression. . . . "The Law that's supposed to be back of us. I wonder where in— it is now! What does it mean to Bill and me now?"

Here in the water wilderness in the creeping twilight, he and Bill were going up against six men who had dug out fifty and who had murdered charges hanging over their heads. And if they broke away, Larry single-handed would have to stand the whole brunt of stopping them.

They Came Up Within a Hundred Yards Of Their Quarry

At his gesture Bill aid cautiously up beside him. In whispers, Alan said to him: "Bill, we've got to get closer. We've got to get across this pond. Those muskeg houses out there are particularly good luck for us. By keeping down in the water, with these little reeds to help hide us, we can sneak from one house to the next. The last one isn't a dozen yards from those men. If we make it we'll have point-blank range and the best kind of cover to shoot from."

"Taking off their hats and jackets, they wriggled carefully out of the flags, eased into the water and squirmed toward the first muskeg house, which stood up four feet above the surface, entirely hid their approach. Behind it they stopped a moment, chose their next one, and sank back into the water.

As they creased down behind the third little dome of mud and reeds, a towering red-bearded man parted the flags they were staring at, bent and scooped up a handful of water, took a swallow, threw the rest down with an oath at its vile taste; and then, snaking the water out of his hat, he disappeared again.

Alan's last secret doubt about these bandits being utter strangers in the country was dispelled now. He had had a clear view of this red-bearded leader; he could say positively, as Ashmun and all the passengers had sworn, that he had never laid eyes on the man before.

To Bill he whispered: "When we reach that lake house, I'll splash or do something to draw their attention. They'll come out to the flag edge

again to see what it is. Don't shoot when just one man shows up. We'll wait till we have three of them in plain sight. If we get three of them at the first crack, we'll be fighting the other three on even terms. Now, Bill, when you're looking down a rifle barrel at those men, don't hesitate. Aim straight. We can't make prisoners of that outfit. This is a finish fight. One or the other party is going to get wiped out."

(To Be Continued.)

New Airplane Nearly Ready For Delivery

Price Of Wales' Machine Will Carry Twelve Passengers

The Prince of Wales' new aeroplane, a powerful twin-engined high performance monoplane, is expected to be ready for flight early this year. The prince's private aerodrome at Smith's Lawn, in Windsor Great Park, has no larger accommodation for a machine of this size, and together with the light aeroplane which the prince has used for the last year or so, it will be housed at Hendon aerodrome.

Like the prince's other aeroplanes, the new machine will be finished in scarlet and blue, making it easily recognizable in the air. Normally the big saloon cabin will be furnished in other craft, with not more than six passengers, though there is room for 12 if necessary.

This means that the prince will be able to travel with his luggage and members of his entourage in the same aeroplane, eliminating the need for his personal staff to fly in other craft when urgency goes with the prince's own partially for air travel to oblige use of the air way. The pilots' cockpit forward will be equipped with full dual controls, and the prince, one of the world's keenest private aeroplane owners and a good pilot himself, may confidently be expected to spend much of his time aloft in one of the pilot's seats.

Men and Machines

More Figures Which Show Great Difference In Production

In ancient Rome, it took one house-maker 5 1/2 days to make a pair of shoes. Today, in a modern shoe factory, one man produces in the same time, 82 pairs of shoes.

Five thousand years ago a brick-maker produced in a 10-hour day, not more than 450 bricks. One man today, working in a brick factory, can produce 400,000 bricks.

A century ago one man produced 25 tons of pig iron a year, and 800 tons of iron ore. In 1929 in the Mesabi range of Minnesota, the production of iron ore per man per year was 20,000 tons.

One man today produces more electric light-glow in an hour than one man could produce in 9,000 hours in 1914. In four days, one man tending one machine could supply the entire Canadian import of electric light globes.

One hundred men, working in a modern brick factory, could supply all the bricks needed to get the United States. No other brick factories, no other men to make bricks, would be necessary.

A modern steel rolling mill in full operation runs with almost no continuous attention, and requires only a handful of men.

Many Have Decoration

French Legion Of Honor Held By 155,649 Persons

Holders of the Legion of Honor now number 153,049, according to statistics just published in Paris. This number includes thousands of foreigners who have been awarded coveted decorations which all Frenchmen aspire to gain. The chevaliers number 125,150, the officers 21,213, and the commanders 3,145. Holders of the Grand Cross total 78.

Large numbers of men, formerly employed in radio manufacturing plants in the Netherlands are returning to work.

Lord Nelson Saved Town

Displayed Courage and Foresight When Battleship Caught Fire

E. E. Long, writing in a recent issue of a magazine recalls an incident in connection with Montega Bay, Jamaica, showing the presence of mind of Lord Nelson, and how his prompt action saved a disaster. His says:

"The British Navy, vessels of the Nelson Navy often visited Montega Bay, and it was here, on one occasion, that Nelson went ashore on a visit and saw from the verandah of a house, which still exists, that one of the men-of-war in the harbor was on fire. Rushing down to the pier he found in a boat, got to the burning vessel, boarded her and had all of her guns, which were trained directly on the town pointed upwards. A few minutes later she blew up and the cannon were discharged. Nelson's courage and foresight had saved Montega Bay."

THE RHYMING OPTIMIST

By Alice Michalco

CHOICE

I'd rather see my eyes glow
 With faith and love and gladness,
 As once I saw them when the world
 Was gay with April madness.

I'd rather see your smiling eyes,
 So brave, clear and tender,
 Than all the gems of all the kings,
 Abalone in royal splendour!

I'd rather hear the voice of you
 In happy laughter flowing,
 As when I heard it on a day
 When April winds were blowing.

I'd rather hear your lifting voice
 In madcap laughter ringing
 Than cherubim and seraphim,
 And all the angels singing.

U.S. Unemployment

Estimated That 11,990,000 Were Out Of Work In November

An "all-time peak" of unemployment in the United States was reported recently by William Green, president of the American Federation of Labor, who estimated that 11,990,000 were out of work in November.

Noting that this figure was greater by 190,000 than the previous high mark, reported for August, he added that word from affiliated trade unions indicated that the total for early December was even greater than that for the previous month.

Prepared For Death

A fish farm in Chaco streams which can dig itself into the mud and live for days in its way to the British Museum. It has two bladders, in which it secretes water for its billions. When rivers dry up between rains the fish burrows into the mud.

The sugar crop of the Philippines last season was 26 per cent greater than that of the year before.

Tea is said to be the world's best popular beverage.

Little Helps For This Week

"When He giveth quietness, who then can make trouble?"—Job 34: 28.
 "None of these things shall move me!"—Acts 20: 24.

I've many a cross to take up now,
 And many left behind;
 But present troubles move me not,
 Nor shall my quest mind.

Let us then think only of the present,
 And not even permit our mind to wander
 with curiosity into the future.
 This future is not yet ours, perhaps
 it never will be. It is expiring
 ourselves to temptation to wish
 to anticipate God, and to prepare
 ourselves for things which He may not
 desire for us. If such things come to pass,
 He will give us light and strength
 according to our need.

We desire to meet difficulties
 prematurely, when we have neither
 strength or light as yet provided for
 them. Let us give heed to the present,
 whose duties are pressing. It is
 fidelity to the present which prepares
 us for fidelity in the future.—Fennell.

King's Lands Profitable

To British Taxpayers

Over Million Pounds Handed Back Yearly In Revenues

The Crown of Britain is the cheapest monarchy in the world. The taxpayers actually make a profit of £460,000 out of the financial relations between the king and the state, for though the king draws a nominal salary of £470,000, he voluntarily relinquishes every £1,210,000 in revenues from the crown lands.

The king's real salary is £110,000 a year. The rest of the list total is earmarked for salaries, expenses, and upkeep of the royal households and palaces; £13,200 is spent every year on royal bounty and alms, apart from personal donations of the king and queen.

Two of the royal residences, Sandringham and Balmoral, are the king's private property. They were bequeathed to him by King Edward.

The Jewish calendar, which assumed its present form in the time of Hillel II, who lived in the fourth century, A.D., dates back to 3761 B.C., thought to have been the date of creation.

One-fifth of the population of the United States attend the movies daily.

WORLD HAPPENINGS
BRIEFLY TOLD

Following a three months' adjournment the joint committee which is investigating the administration of the Pension Act reassembled in Ottawa. W. Martin Griffin, R. C. Vancouver, has been retained by the Dominion government to revise the Canada Shipping Act. He has gone to Ottawa to undertake the task.

Sir Hubert Wilkins, noted British explorer, said he planned to leave the United States in April for Norway to join the Ellsworth-Balchen expedition to the Antarctic.

Amendments to the Canada Shipping Act are being drafted. The legislation will be brought down this session. The measure will stand over from the previous session.

Charles Wong, first Chinese to receive a private airplane pilot's license, is leaving Winnipeg for China where he will join the Chinese government air force.

Selling alone in an 18-foot skiff, Fred Robell, Australia's "edgely" navigator, put in at San Pedro, California, January 9, after a year-long 8,000-mile voyage from Sydney.

Canadian water colors will be exhibited in at least 12 of the largest cities in Great Britain in the next year and a half, officials of the National Gallery stated at Ottawa.

Julius Meinertzhagen, scientist, lecturer, picturesque missionary of another day among the Indians of Northern Ontario, Alberta and Saskatchewan, died suddenly in Toronto in his 76th year.

International debts may be used by the United States to reduce trade barriers against the products of that country, according to the opinion expressed by Premier Bracken during an interview at Winnipeg.

Prof. John H. Williams, one of the American delegates to the preparatory committee for the world monetary and economic conference, told the committee that he believed high protective tariff sentiment in the United States is abating.

Unemployed in Germany
Are Becoming Apathetic

Many Have Completely Given Up Thought of Working

A press despatch from Berlin, says the moral effects of prolonged unemployment are being studied by sociologists, who note a strong tendency among the unemployed to accept their situation as a normal one and to abandon completely any thought of returning to work.

Men who had always had jobs in the past spend the first few weeks or months of their unemployment looking for work. They go from one office or factory to another, looking for application forms, and after repeatedly being turned down they give up looking for work altogether and even refuse to take any training or reports that jobs are vacant.

Numerous cases have been reported in which unemployed men have taken to their beds, saying no far from indolence that they lack the energy to get up. Still others spend their days sitting in a chair, vacantly gazing into space. Hundreds of thousands of men throughout Germany, it is declared, have totally abandoned any idea of ever working again.

That many others, however, have not become wholly apathetic is attested by library statistics. The free libraries of Berlin are besieged by unemployed men. In one working class quarter the number of readers has more than tripled since the unemployment crisis began, and it is estimated that the increase in readers is due to unemployment is between 40 and 70 per cent. in Berlin as a whole.

Another pastime of the unemployed is bathing. Never have the open air bathing establishments in and near Berlin seen so many bathers.

"Smoking," says the *Vossische Zeitung*, "is the sole real luxury of the unemployed—at least of those who are able to buy anything to smoke."

Many unemployed who pride themselves on their ability to withstand hunger declare that they are unable to give up cigarettes, saying that "if you don't smoke, you're dead."

Started at Small Way
Many will be surprised to learn that California's large navel orange industry had its inception in two small trees imported from Brazil and taken by stagecoach from Washington, D.C., sixty years ago. The story would seem to be the seedling version of "Big game from little acorns grow."

W. N. U. 1977

Flight Scheme Dropped

Professor Picard Will Not Ascend From Hudson Bay District

Canada's Hudson Bay district will not see a flight to the stratosphere by Professor Auguste Picard after all. The famous explorer of the upper regions in New York where he starts a series of lectures.

The reason he will not make the Hudson Bay attempt himself, he explained, is because, "The men who make the flight must be scientists familiar with the northern regions."

The greatest difficulties of that attempt would be landing in that remote region and transporting the materials and equipment," he said. "A system of signals for guiding the pilot from the ground by wireless must be used."

First of all, Professor Picard said, it would be necessary to find a man, "with a big pocketbook," who also had a genius, intelligent interest in scientific matters, to finance the expedition.

Tribute To Queen Mary

Good Example As Housewife Opinion Of Her Treasurer

Queen Mary is "too good a housewife" in the opinion of Sir Edward Wallington, who at the age of 73 years, has just retired from the post of Treasurer to the Queen.

"I have paid all the Queen's private bills since my appointment 13 years ago," says Sir Edward, "and not once had I to query her accounts. She is an example to the housewives of Britain for wise shopping, careful spending and discriminating choice."

Business World All At Sea About Its Position

One of the best stories going around Washington now is Owen D. Young's description in a recent director meeting of how the business world is acting in the depression.

"It strikes me," he said, "that we're all in the same boat with Christopher Columbus. He didn't know where he was going when he started. When he got there he didn't know where he was. And when he got back he didn't know where he had been."

The Coldest Temperature
The coldest natural temperature known about this little planet, says Dr. Beno Gutenberg, geophysicist, is just about 10 miles above the equator. At that point the temperature has been measured at 150 degrees below zero Fahrenheit.

To see an untrained British boyboadie an untidy group in a London slum is an education.

Many new gold-dredging companies are being organized in New Zealand.

313

A SLENDERIZING STYLE YOU'LL LIKE

Its smart tailored lines meet everyday requirements.

Almost any of the soft new wools are lovely for this model—a very becoming style in the normal or slightly over-normal figure.

You'll notice that since the center of the crossover bodice is cut in a panel effect and left belted. It comes with the skirt panel to add height to the figure.

Rough crepe knit would be equally suited to this model.

Style No. 313 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 and 44 inches bust.

The original was in the popular rust tone in a diagonal, woolen weave. White pique was used for the inset.

Size 36 requires 2 1/2 yards 54-inch with 1/4 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (in preferred). Wrap coin carefully.

Royal Command Has Lasted

Queen Victoria Set Height Limit For London Buildings

A Queen's wish has kept the London "sky line" close to the ground. The story of that wish, by which no London building can be built higher than 80 feet to the top of the parapet, with two stories in addition, has been laid before the Royal Society of Arts.

It was told by Maurice P. Webb, architect, who said that Queen Victoria, gazing out of her window in Buckingham Palace one day, was struck with the height of Queen Anne's Mansions.

This building, still one of London's highest, towered above Westminster's smaller dwellings.

She sent for her minister, and insisted on a height limit being included in the building act. The royal command has lasted through the years.

No Mishaps In Air

Vancouver's Sea Island Service Had No Accidents In 1932

Vancouver's sea island airport carried on its activities during 1932 without a single accident, according to the report of Manager William Templeton, to the civic airport committee. Passenger flights for the year covered 707, test flights, 40; student instruction flights, 751; student solo flights, 1,859; arrivals, 309; departures, 303; visiting aircraft, 134, and passengers carried 2,482.

Recipes For This Week

(By Betty Barclay)

BAKED APPLE WITH ORANGE

Serves 6.
6 baking apples.
Seedless raisins.
1/4 cup orange juice.
2 tablespoons sugar.
Orange slices.
Sugar.
Quick cooking lapins.

Core apples leaving cavity at stem end. Stuff cavities with raisins. Add sugar to orange juice and fill any remaining space in cavities with this. Cover cavities each with orange slice dipped in sugar. Add enough water to remaining sugar and orange juice mixture to fill pan halfway. Add 2 tablespoons quick cooking lapins to each cup water used, putting bits of orange slices also between apples in pan. Bake until apples are tender.

The orange makes a very pretty garnish for the apples and adds a delightful flavor.

Roast slices and lemon juice may be used in place of orange, in which case more sugar will be needed.

BAKED SALMON AND SWEET POTATOES

Bake 6 medium sized sweet potatoes. Mash, season with salt, pepper and butter. Add 1/4 can of finely flaked canned salmon. Mix all together. Place in buttered baking dish, spread top with melted butter, garnish with 1/4 can salmon. Bake 15 minutes. Heat 5 or 6 minutes and serve.

SUNDAY SCHOOL LESSON

JANUARY 22
JESUS FORGIVING SIN

Golden Text: "The Son of Man hath authority on earth to forgive sins."—Mark 2:10.
Lesson: Mark 2:1-12.
Devotional Reading: Psalm 32:1-7.

Explanations and Comments

Jesus is Criticized For His Words To A Paralytic, verses 1-12.—On one of Jesus' visits to Capernaum, his headquarters, it became known that he was in the house and the people hurried thither in great excitement. They crowded into the room, jammed the door leading to the street, and hung around in crowds outside. Four men, who had heard of Jesus' wonderful deeds of healing, determined to bring to him a friend who was paralyzed. But when they approached the house carrying the paralytic on a light pallet, no one would make way for them.

The hearers of Christ were so anxious to get every word that fell from his lips that they shoved the man out of the way in order that they might hear the better. The picture is typical. It is well enough to seek for ourselves the highest advantages of Christian worship, to go to church, to pay for the costliest architecture and the most elaborate services, but to miss the Gospel scene where every man, woman and child is eager to be edified in him the real spirit of Christian unselfishness.—Francis J. McConnell.

The four men were persevering and their faith was encouraged. They carried their burden up the outer stairway to the roof, removed the tiles, and made a hole large enough to let the man down on his bed into the lap of the Great Physician.

The four friends brought the paralytic to Jesus for bodily healing. Jesus began to reward them by forgiving the man's sins. Seeing this, the other three men said to the man, "Son, thy sins are forgiven."

"And what was in man's mind 2:20, and knew that the man needed spiritual healing as well as physical help. 'See what the faith of others may do for one!' exclaims an ancient writer.

Jesus distinctly recognized the faith of the hearers as well as that of the sufferer who was borne. Humanly speaking, the palsied man could not recover and salvation to the faith and self-sacrifice of his four friends. The great lesson comes out here that to unknown extent it is possible to inspire and to bring about the salvation of others by faith and co-operation. Our faith cannot supersede theirs. It is never a substitute for the faith of those more weakly concerned; but it prompts Jesus to strengthen their faith.—W. L. Mediatson.

A Quick-Witted Guide

Showed In Clever Way He Knew King Of Belgium

A new story is told about King Albert of Belgium. He is a notably modest monarch, and often travels incognito. One of his hobbies is Alpine sports. He sometimes sets out with a simple rucksack firmly convinced that nobody recognizes him, and calling himself Monsieur Durand, a name as common in Belgium as Smith in England. On a recent mountain trip the King took with him a guide who showed no sign of recognizing him. He was asked to lead him to the neighborhood of a peak which in his honor has been named Mount Albert. Stopping for a rest on his way the King questioned the guide about the names of the various mountains, and finally to put his incognito to the test pointed to his own mountain. "And that," he said, "is Mount Albert, isn't it?" "Non, Monsieur," answered the guide, "that's Mount Durand."

Ski Jumpers Buy Snow

Illinois Club Ordered Six Car Loads From Wisconsin

It may not have moved in sufficient quantities for ski jumping, but the Norge Ski Club had won for its annual tournament at Gary, Ill., on January 15.

After canvassing the region, club officials learned that there was plenty of snow about 400 miles north of Chicago, up in Wisconsin, and placed an order for six freight car loads.

A Matter Of Taste

When you're a married man, Samvel, you'll understand a good many things as you don't understand now, but never it's worth while going through so much to learn so little, as the charity-boy said when he got to the end of the alphabet, is a matter of taste. I rather think I isn't.—Charles Dickens.

Nose rings, like those worn by African slaves are said to be the fashion in Paris.

London had 4,682 fires with an average damage of \$750 last year.

Glasgow, Scotland, will appoint a woman police sergeant.

"Canada 1933"

Official Handbook, Dealing With Present Conditions As Now Available

The Dominion Bureau of Statistics announces the publication of the 1933 edition of the official annual handbook dealing with present conditions and recent progress in the Dominion.

The publication, prepared under the word by the Hon. H. H. Stevens, an introduction of eight pages outlines the world situation as it affects Canada. The publication deals with topography and climate and constitution and government has been omitted in this edition in order to make way for a fairly brief treatment of the Imperial Economic Conference, which appears as Chapter I. Detailed treatments of all phases of national endeavor including Population, Wealth and Production, Agriculture, Forestry, Mining, Water Powers, Fisheries, Fur Trade, Manufactures, Transportation, Trade, Finance, Labor, Education, etc., follow.

The book is designed to give a complete well-rounded picture of the current Canadian situation, to those at home and abroad, and to provide a better basis of information for the discussion of Canadian affairs generally and in particular dealing with the business problems of 1933. It is profusely illustrated and printed in type to harmonize with the artistic cover.

Throughout the handbook the latest available information is included, and the figures in many cases extending to the end of 1932.

Applications for copies of the handbook should be addressed to the Dominion Bureau of Statistics, Dominion Bureau of Statistics, Ottawa.

French Write Notes

Think Habit Of Sending Christmas Cards Is Too Expensive

Don Bradman, a former Canadian student in Paris writes, "The expensive habit of Christmas cards, you may be sure has not yet taken firm hold among the thrifty French. They send personal greetings, that's certainly enough, but rather by the direct, intimate and fatiguing path of writing Christmas notes. The week preceding the holidays, hence, becomes a period of care and tribulation to anyone overly blessed with many friends. To each must go a short note of greeting, each note similar to the other, each with its odd scrap of news and its best wishes for the coming year. Ten, 20, perhaps 30 or 40 letters, carefully penned in longhand go forth in the mail, while the sender waits eagerly day by day to see whether he or she too is going to be remembered in like fashion."

Danger Of Inflation

System Is Hard To Control When Once Started

Another champion of inflation is Dr. H. C. Brown, a Belgian as Smith in England. He thinks it would be a good thing for Canada to inflate her currency and deflate the dollar. He also thinks that any government that attempts to prevent a repetition of what happened in Germany when inflation brought a situation where \$125,000 was needed to buy a loaf of bread. But Dr. Sandwell does not say who is going to decide where inflation is to stop. Once started, the business of printing paper money is hard to curb. That's where all advocates of controlled inflation leave us in the air. They do not say who will control or how it will be controlled.—Border Cities Star.

An Artificial Heart

Devised Has Been Developed and Tested By Moscow Surgeons

An artificial heart has been developed by Moscow surgeons, who, when perfected, is expected to revolutionize methods of operating on the heart. It is a device for pumping the blood through the arteries like a real heart. The heart of a living dog was taken right out of its body and operated on while the "artificial heart" kept the body alive. Sixteen strokes were taken in the heart and then it was put back into the body. The dog has survived.

Prince Masters Petal Point

That form of embroidery known as petal point has yielded its secrets to the Prince of Wales, who within a year has knitted scarves for a guild sponsored by the queen. One of his first pieces of work is a commemorative board which was on view at a recent exhibition.

The science of fighting fire has become so specialized that the fire departments of large cities are organizing fire colleges to train their men.

PREFERENCE HITS UNITED STATES GRAIN INTERESTS

Washington.—Grain exporters and shippers of United States in conference here have formed a technical committee. Its duties are chiefly to try to solve difficulties presented by the United Kingdom's decision to grant the six cents per bushel empire preference on Canadian grain only when it is shipped via an all-Canadian route. It affects 100,000,000 bushels of wheat annually.

With the ruling in effect Canadian growers ship through Montreal, Vancouver, Saint John and Halifax. This strikes a hard blow at Buffalo, New York; Albany, Philadelphia, Baltimore, Norfolk and other United States shipping centres. It is claimed that with United States railroad, elevator, shipping and exporting interests ending, porting, against the ruling the state department here arranged for a conference at which representatives of these organizations conferred with the government officials.

Prior to the conference the British embassy despatched a note to the state department which, according to the Journal of Commerce, was conciliatory in tone and expressed hope for the 1918 agreement upon which the grain ruling was based could be met by the United States interests.

To Lessen Bandit Hazard

Oklahoma Banks Close Doors During Noon Hour

Oklahoma City.—In an effort to lessen the hazard from bandits, more than 100 banks in Oklahoma now are closing during the noon hour and allowing no one in the bank during that period.

The Oklahoma Bankers' Association is asking all banks, except those in the larger cities, to adopt this rule. The hazard from bandits is greatest during those hours when most employees are out of the bank and few persons are on the street, an examination of records shows. Strict enforcement of the "no admittance" rule outside banking hours lessens this hazard.

Professor Piccard Arrives

Has Hopes Of Arousing Interest In His Super-Balloon

New York.—Professor Auguste Piccard has arrived from Europe with hopes of arousing interest in a "super balloon" flight to 10 miles altitude in northern Canada, and with decided notions about the use of tobacco.

The scientist's first act, as his boat neared its destination, was to request interviewers not to smoke and to announce that if he had the powers of a dictator he would prohibit the use of tobacco rather than alcohol.

Home Rule For Scotland

Question Is Revived As a Campaign Issue

East Fife, Scotland.—The question of home rule for Scotland has been prominent in the campaigning for the by-election to the House of Commons from this constituency due here shortly.

Lord Dalziel, former member of parliament and newspaper proprietor, is among the supporters of the Scottish Nationalist candidate who is urging the home rule for Scotland.

Would Grant Pension

Washington.—A pension of \$3,000 yearly for Grace Goodale Coolidge, widow of the late former president of the United States, was sought in a bill introduced by Senator Warren R. Austin, Vermont Republican. Congress usually votes pensions to the widows of former presidents.

Alberta Seed Growers

Edmonton, Alberta.—Joseph H. B. Smith, of Wolf Creek, Alberta, was elected president of the Alberta Seed Growers' Association recently at the directors' annual meeting. Mahon Watson, of Provost, was chosen vice-president.

Ensure Dollar Wheat

Montreal, Que.—Dutch farmers get \$1 a bushel for their wheat, while in P. S. State, Dutch seed merchant, who is here on business. The government provides a subsidy to bring the price up to this amount.

W. N. U. 1077

Property Owner Not Protected

Debt Adjustment Act Provides Only For Present Occupant

Saskatoon, Sask.—While governments are giving protection to persons in possession of property, and who are living therein, under the terms of the Debt Adjustment Act, which have been purchased on agreements of sale, or for which a second mortgage has been taken, no consideration has been given to the original owner who sold the house and who is relying on principal and interest payments to meet obligations incurred in the creation of the property," states C. D. Kyle, Saskatoon barrister.

"Many people who have invested their life savings in such properties are now being the threat of loss of their equities, as the concessions made the occupant owner by the Debt Adjustment commission has cut off the investing interest from the property to the original owner to such a low mark that he is unable to meet interest, principal and other charges against the property."

Criticizes Board

Charges That Land Board Of University Has No Real System

Winnipeg, Man.—Charges that for 10 years the methods of the land board had the "loosest imaginable system of directing the investment of the University of Manitoba," which was its statutory duty, were made before a board of inquiry by J. T. Thomson, K.C., in summing up the evidence regarding the \$1,000,000 deficit in University of Manitoba funds.

Mr. Thomson, assistant counsel for the commission, pointing out the shortages, said no member of the board ever asserted his authority to direct the investments which, he said, was a "most embarrassing situation." No member of the board, he said, ever went to the board of governors to find out what authority the land board had.

Entry From New Zealand

First Received From That Country For Grain Show Competition

Regina, Sask.—First entry from New Zealand to the competitive classification in the revolving show, has reached the office of the organization. It came from D. McGill, a farmer of Tipton, Southland, New Zealand, in the oats class.

A few days ago 12 entries came from T. A. Allan, a farmer of Melbourne, Idaho, his entries being as follows: four wheat classes, four barley classes, two rye classes, one dent corn and one millet.

Closing dates for entries is January 31 and closing date for receipt of grain samples is March 1.

South African Politics

General Snuts In Favor Of A Coalition Government

Cape Town, South Africa.—Tension in South Africa's political situation was augmented when General Jan Christian Smuts, leader of the South African party, arrived here to confer with his colleagues regarding negotiation to overthrow the government. Thousands of cheering people greeted General Snuts on his arrival at the station from Johannesburg.

In a brief interview the general indicated his willingness to accept a subordinate part in a coalition government if it appeared in the best interests of the nation.

British Trade With China

Vancouver, B.C.—The one ship per month which the British Canadian Steamship Company had estimated to take care of the subsidized Canadian-China lumber trade has proved inadequate and four steamers will take about 12,000,000 feet to the Orient within the next six months. The same ships will also take 9,000 tons of wheat and 1,100 tons of salt fish.

Gas Conservation Plans

Calgary.—Temporary withdrawal of motions questioning legality of public hearings of the Turner Valley gas conservation board was effected until January 23 and the very left open for the board to further its studies with a view to conserving gas for domestic use in southern Alberta cities and towns.

Visiting Western Canada

Ottawa, Ont.—Dr. E. S. Archibald, director of the Dominion Experimental Farm, is in Western Canada, where he will spend the next few weeks touring the various experimental farms in the west. While there he will attend an executive meeting of the board of directors of the World Grain Fair at Regina.

Want Uniform Relief Policy

Alberta Federation of Laborers Concludes Session

Calgary, Alberta.—Establishment immediately of a uniform relief policy by the Alberta Government was sought by the Alberta Federation of Labor in concluding its annual convention here.

Alderman Fred J. White, M.L.A., Calgary, was re-elected president for an eighth term, and Carl E. Berg, Edmonton, was elected secretary-treasurer to succeed Elmer E. Roper, Leduc, who sold the house and who is relying on principal and interest payments to meet obligations incurred in the creation of the property," states C. D. Kyle, Saskatoon barrister.

"Many people who have invested their life savings in such properties are now being the threat of loss of their equities, as the concessions made the occupant owner by the Debt Adjustment commission has cut off the investing interest from the property to the original owner to such a low mark that he is unable to meet interest, principal and other charges against the property."

JAPANESE SEEK CONTROL OF JEHO PROVINCES

Shanghai, China.—Ten thousand Japanese soldiers are marching into the province of Jehol, Chinese press dispatches said today, and are en route to Lingyuan, which is about 90 miles north of Shanhaiwan, the city at the eastern end of the Great Wall, occupied last week by the Japanese.

The dispatches also said a Japanese landing force had gone ashore at Chingwangto, Chinese seaport about 10 miles southwest of Shanhaiwan. Patrols have been put out by the landing force, it was reported. The column proceeding into Jehol, the dispatches asserted, included artillery and cavalry marching from Suiching, north of Shanhaiwan, which is in Japanese hands.

Japanese military leaders have said for some time that they intended eventually to gain control of the province of Jehol and to annex it to the state of Manchukuo which has been established with their assistance, to administer Manchuria.

The city of Jehol, capital of the province, used to be used by the Manchú emperors as their summer residence. The National Government at Nanking has reiterated that it will not accept the Japanese thesis that the capture of Shanhaiwan is a local incident. Instead, the Chinese policy is that the occupation of that city is part of the whole Chinese Japanese dispute which is awaiting settlement by the League of Nations.

URGES DOLLAR-POUND PARITY

The Hon. L. P. D. Tilly, Minister of Lands and Mines in the New Brunswick cabinet, in a recent speech urged the establishment of the Canadian dollar on a parity with the British pound, with a view to revitalizing Canadian industry.

Geneva Conference

Fort-Hour Working Week Is Advocated By Delegate

Geneva, Switzerland.—The question of the maintenance of wages at their present level or reducing them arose as a crucial issue at a discussion of a proposal for a 40-hour working week before the international conference on unemployment.

Leon Jouhaux, general secretary of the French confederation of labor, declared that working hours must be reduced without any wage sacrifice.

M. Jouhaux told the conference that unless the world unemployment situation is relieved civilization may be destroyed. Thirty million men and women—sixths of the world's workers—are jobless, he said, and even a revival of industry would not provide a remedy. For technological unemployment would remain a tremendous factor.

Concessions To Peasants

Russia May Decide To Abolish Grain Concessions

Moscow, Russia.—A long-expected concession to the peasantry in the effort to extract from that class enough agricultural produce to feed the country assumed definite form in the publication of a speech by Vyacheslav Molotov.

The president of the union council of the people's commissars announced that the government probably would abolish "collections" of grain and substitute a grain "tax" in kind. Returning to a system in effect 10 years ago, the grain production of the country would hereafter be placed on the recently instituted basis for meat and butter production.

Pension Act

Veterans Claim Something Wrong With the Way Act Is Operating

Ottawa, Ont.—An impressive array of veterans, each well-equipped with experience in the intricate solving of pensioners' problems, appeared before the joint committee investigating the administration of the Pension Act, and told that body what they considered to be wrong with the way the act was operating.

Practically all witnesses were unanimous in their disapproval of the attitude toward returned soldiers of the council employed by the board of pension commissioners.

"Sometimes," said A. E. Moore, president, chairman of the Canadian Legion, "I listen to these counsel and expect every moment to hear them turn to the tribunal with the words: 'I therefore submit that this man be taken from hence and hanged by the neck until he is dead.'"

Witnesses argued that section 73 of the Pension Act, known as the "benefit of the doubt" clause, was not being applied in accordance with the intention of parliament and of the people of Canada.

It was impossible, so many years after the close of hostilities, Mr. Moore declared, for a man to establish definitely the circumstances and the place responsible for inflicting upon him the state of health that eventually resulted in a disability. The onus of proving conclusively that the man's disability was not due to war service should rest with the board.

Russia Executing Thieves

Men Sentenced For Stealing Jam From Government Warehouses

Moscow, Russia.—Four men were sentenced to death and three others to 10 years in prison for stealing jam from a government warehouse. The manager of the warehouse and three employees are to be shot, three other employees will go to a prison camp in the most remote region of the country. The two others must spend three years in jail for the crime, which was characterized as "causing great harm to the workers' supply."

CENTRAL PARTY OPPOSE POLICY OF DE VALERA

Dublin, Irish Free State.—The Central party in the Irish Free State election campaign issued a manifesto indicating it intends to secure, if possible, the balance of power in the new all-Ireland parliament.

Frank McDermott, leader of the Central group, which has the support of the National Farmers' League and the Baiters' League, said in the manifesto his party was not going to be "captured" by the National party nor allow its politics to "drift into the hands of the 'right' men."

At the same time the proclamation denounced President Eamon de Valera and his Republicans and said the Centralists would seek "long delayed justice" given the agricultural community.

The party, it said, would do its best to see increasing war waged against poverty and intolerance, "two deadly enemies of a kindly, self-reliant Irish nation."

What success the Centralists would have at the polls on January 24 was uncertain, but they appeared to have secured considerable friendship among the farmers of the nation.

Nominations, which closed tonight, showed the Centralists with 21 candidates in the field while the Laborites had placed 22.

Spanish Riots

Estimated That 42 Persons Have Been Killed

Madrid, Spain.—Outbreak of anarchist and syndicalist violence, which began recently, continued in many Spanish cities, although governmental authorities declared their belief that the disturbances had definitely been quelled.

It was estimated at least 42 persons have been killed during the disturbances which have been marked by frequent bomb explosions, seizure of armaments of public buildings and documents, and efforts to disrupt communications.

The number of persons injured has not been officially estimated, but it is thought the toll will reach far above 100. Numerous persons have been arrested.

BOTANISTS ARE WINNING BATTLE AGAINST RUST

Toronto, Ont.—Botanists are winning the battle with rust disease, menace of western Canadian grain crops. Dr. Margaret Newton, plant disease expert of the Dominion research laboratory at Winnipeg reported at a conference here.

While it was formerly thought that each of the stem rust diseases attacked each kind of grain in a different way, Dr. Newton said it now was seen that similarities are apparent between many of these diseases. When it becomes possible to control one of them, she said, the others will soon be brought under subjection.

It had been discovered, said Dr. Newton, that the fastest-growing part of the leaves or stalk of wheat is the easiest prey to the invading rust. She described how the seedlings of the mould grow on the foot of the plant. Susceptibility to the disease thus seems associated with the factors which make for fast growth, she added.

The second development in investigation of the disease revealed that crop or barley rust of wheat will also attack the seedling. This was found from laboratory experiments. Dr. Newton said, and added this cross-infection has not been reported under field conditions. The findings mean that the parasites are not as specialized as had been supposed, said Dr. Newton.

May Use Scrip Money

City Of St. Paul Is Investigating Legality Of Issue

St. Paul, Minn.—Possibility of scrip money by the city and county for relief of unemployment has been approved by the city council, which also ordered an investigation of the plan's legality.

Under the proposal of Mayor William Mahoney, the certificates would be issued against \$100,000 reserve fund to be set up by the board of public welfare. They would be used to pay workers on projects inaugurated to provide jobs for the unemployed.

To each \$1 certificate, a two-cent special stamp would be added weekly by the holder. At the end of the year the certificates with \$1.04 in stamps attached would be redeemed by the welfare board for \$1 in currency.

Military Strength Of Nations

U.S. Observer Says Russian Is At Top Of The List

Washington.—General Douglas MacArthur, chief of staff, ranks the United States 17th in military strength of land forces among the nations of the world.

The general ranked Russia at the top of the list in organized active and trained reserves with a total of 18,870,000. France was second with 8,975,000, Italy, 8,000,000; Spain, 2,240,000. Japan, 2,177,000, and the British Empire was ranked 11th with 1,168,000, or below Poland, China, Rumania, Czechoslovakia and Jugoslavia.

Kidnaping Plot

Millionaire Contractor In East Receives Threatening Letters

Toronto, Ont.—Kidnaping plot which police regard with the utmost gravity is said to have been disclosed in an extortion letter received by Francis Joseph, millionaire contractor of Mimico. The Toronto Star says it learned from an authoritative source.

The first letter demanded "a fabulous sum" and threatened abduction of Francis Joseph's little daughter. A second letter is said to have been received and guards patrol grounds of the contractor's home.

Bequest Goes Begging

Winnipeg, Man.—George Veltz, power citizen left \$1,000 to the "Newspapers Club of Winnipeg" when he died in 1912, but no such organization now exists and executors may be forced to apply to the Manitoba legislature for the necessary authority to dispose of the bequest.

Death Of Senator Daniel

Saint John, N.B.—Hon. Dr. J. W. Daniel, doctor of the Canadian senate, died suddenly at his home January 23, after a long illness. He was 68 years old on January 26. The aged senator had been ill since Saturday, January 17, with influenza and complications.

THE CHAMPION BADMINTON CLUB

is throwing a BIG PARTY at their CLUB HOUSE in CHAMPION on JANUARY the 20th. Will that party be YOU? You've tried LISTERINE, you've tried PEPSODENT, you've tried LIFEBOUY SOAP; what good have they done? If you really want to be popular, dig up FIFTY CENTS and come over to this

BIG DANCE and PARTY

CHAMPION COMMUNITY HALL, Fri., Jan. 20

LUNCHEON

Breast
of Bronze
Turkey Salad
with all the
trimmings
20 cents
extra

There'll be FUN Galore (unless you can think of something better). Here's your chance to insult your best friend for only FIFTY CENTS. A Smart Band of Wandering Minstrels will dispense SWEET and SNAPPY MUSIC.

EXTRA SPECIAL ATTRACTION

The TECHNOCRACY GIRLS! Four of the greatest lady players of all time, who are now touring this country, will burlesque a set of Badminton for the benefit of the many who will be there, especially for those who have never seen this wonderful game played, and remember, that NATURE in the RAW is seldom mild. Fred Watts, Sec.

January Meeting Women's Institute

The January meeting of the Women's Institute was held at the home of the president, Mrs. Baker, with twelve members and several guests.

A report of the Good Cheer Committee was read, also several letters of thanks to the same.

Greetings were read from the Provincial President, the District Director and the Constituency Convener.

The program for the year was arranged and the meeting adjourned, after which delightful violin music by Miss Ferguson, assisted at the piano by Mrs. Lohmeyer, lunch provided by Mrs. Clever and Mrs. Alexander, Mrs. Baker and Mrs. Watkins assisting, and a good collection finished up a very pleasant and satisfactory afternoon.

Mrs. Royal Ruggles, who was operated on at the Vulcan hospital on January 11, is reported to be doing nicely.

The annual meeting of the Champion United Church will be held at the close of the evening service Sunday, January 22. All officers at head of departments of the church's work are asked to report.

The Blusson annual church meeting will be held Monday evening, January 20th, at 8 o'clock, in the school house.

Feed Grinding

Grind your feed with a Hammer Mill and get along with half the feed. Grinding done at your farm \$1.50 an hour. Use your own power.

Sam Beingsen

Wanted

Anybody requiring some good young horses inquire at Sam Beingsen's.

WE SELL AND RECOMMEND
**Wampole's
Extract of
Cod Liver**
The Best Tonic for
Coughs, Colds,
Influenza and Grippe

IT IS better than ordinary cough medicines, for it reaches the seat of the trouble, relieves the cough and supplies continual treatment to build up the system to withstand future attacks. A splendid blood and body-building tonic for both young and old who take it regularly.

There was a day when a Dollar looked as small as this:
Nowadays, when one gets to this office it looks bigger than this:

\$

Everyone is reaching for the elusive dollar these days and they do not stay long in one place.
If anyone could find an excuse for paying us an odd dollar we could assure them it would continue changing owners rapidly as far as we are concerned, and would be a source of great joy to some pressing creditors we have required.

Children Need the VITAMINES in WAMPOL'S EXTRACT OF COD LIVER

Vitamines—that mysterious "something" which makes the young grow—will be found in Wampole's Extract of Cod Liver, as well as other elements necessary for the development of health and strength.
Children who seem to be at a standstill—lacking in energy or vitality—and convalescents who do not improve readily, get just the needed tonic stimulant effect from a short treatment with Wampole's Extract of Cod Liver.
